SUMMARY

Senior Software Engineer with 3+ years of experience building scalable web applications. Specialized in full-stack (React, Node.js, and PostgreSQL) and AI-assisted development using Claude Code/OpenCode. Active technical writer with publications on CSS-Tricks and freeCodeCamp. Maintainer of open-source projects.

WORK EXPERIENCE

Senior Software Engineer

Aug, 2026 – Present

Allata

- Working in the infra team of an AI Accelerator which is designed equally for 3 use cases: business users, developer coding assistance, and advanced document analysis.

Software Engineer

May, 2023 – Aug, 2026

Allata

- Redesigned a PostgreSQL backend for multi-tenancy, scaling one database instance to 5,000 clients.
- Implemented AG Grid virtualization and asynchronous Excel exports for 20K+ records.
- Led 3 migrations: AWS jobs to Azure Functions, React Router v5 to v6, and Bunyan to Winston.

SWE Intern

Jan, 2023 – May, 2023

Allata

- Built 1 ATS with 4 frontend technologies - React, TypeScript, MUI, and Jest - while applying Agile methodology.

Creator

Feb, 2022 – Present

Syntackle

- Built [syntackle.com](#) with 11ty, Gulp, Rollup, and PostCSS, generating 5M impressions on Google.
- Published community-driven tutorials on web development, CSS, JavaScript, Jamstack, serverless, and developer tools.

PROJECTS

- [Better](#) – A code reviewer GitHub action powered by AI
- [back-to-top](#) – A web component
- [rssed](#) – A collection of RSS feeds of hundreds of independent developers as well as publications which updates itself everyday
- [mbuffs](#) – A collaborative movie recommendation web app built using AI
