

Murtuzaali Surti

Software Engineer

Software Engineer with 2+ years of experience building scalable web applications. Specialized in full-stack development with React, Node.js, and PostgreSQL. Active technical writer with publications on CSS-Tricks and freeCodeCamp, and maintainer of open-source projects. Find me coding on my open source projects such as [better](#) and [rssed](#), or writing on my [blog](#). Passionate about building robust applications and sharing technical insights.

Work Experience

Software Engineer

Imriel (An Allata Company)

May, 2023 - Present

- Working on an enterprise application related to the management of legal entities of a business. Mainly working with React, Node, NestJS, PostgreSQL and Docker leaning more towards the backend side.
- Re-designed the backend architecture to support storing multiple client data into a single PostgreSQL database instance in a multi-tenant architecture. Tackled massive performance issues and improved scalability to support 5000 clients on a single database instance.
- Worked on a micro-frontend (MFE) built in React of the same application and improved it in terms of usability. Implemented AG Grid virtualization to allow asynchronous data exports of 20K+ records using the AG Grid excel export API.
- Worked with Azure functions by replacing an in-house job scheduler with Azure functions and successfully migrated multiple jobs. It was a part of the move of replacing AWS with Azure.
- Migrated a lot of vulnerable and outdated packages including the upgrade of react-router from v5 to v6 which was a fairly big change considering the amount of legacy APIs used in the project, and the migration of the logging architecture from Bunyan to Winston for application-wide logging. Ensured application stability and maintainability by migrating vulnerable packages.

SWE Intern

Imriel (An Allata Company)

Jan, 2023 - May, 2023

- Developed an Applicant Tracking System (ATS) using React, Typescript, MUI and Jest as a Frontend Software Engineer, and also developed an understanding of the Agile methodology in software development.

Creator

Syntackle

Feb, 2022 - Present

- Built a blog from scratch using [11ty](#) with some progressive JS as well as gulp, rollup, and PostCSS which are a part of the build process.
- It's mainly a software development blog covering topics & tutorials related to the web, css, javascript, dev tools, jamstack, serverless and much more. It encourages community engagement by allowing users to contribute content, thus fostering a collaborative environment for knowledge sharing. - [syntackle.com](#)

Education

Bachelor of Computer Applications - Navrachana University

July, 2020 - May, 2023

Grade: 8.99 (CGPA)

Projects

- [Better](#) - A code reviewer GitHub action powered by AI
- [Syntackle](#) - A developer blog built using a static site generator named 11ty
- [back-to-top](#) - A web component
- [rssed](#) - A collection of RSS feeds of hundreds of independent developers as well as publications which updates itself everyday
- [Wavy](#) - A JavaScript animation library
- [Contact Card](#) - A digital business contact card generator which is quick to share
- [mbuffs](#) - A collaborative movie list built using AI

Talks & Achievements

- [AI Hackathon Winner](#) at Imriel (An Allata Company)
- [The voice of simplicity](#) - What the JAM podcast (Featured Talk)
- [Building Projects & Learning Mindset as a Developer](#) - Ganesh Patil's Podcast (Featured Talk)
- Wrote for developer publications such as [freeCodeCamp](#) and [CSS Tricks](#)
- [Top 7 Author Of the Week](#) on DEV.to
- Gave a [talk](#) at HacktoberFest 2021 at Navrachana University.

Skills

Computer Languages: JavaScript/TypeScript, HTML, CSS

Frameworks/Tools/Libraries/Database: React, NestJS, NodeJS, Express, Docker, SQL, PostgreSQL, Astro, 11ty, Markdown, EJS, bash, Git

Soft Skills: Technical Writing ([syntackle.com](#))
